Brief introduction

Hi, I'm a Full-Stack developer | Next.js + NestJS | TypeScript.

Building scalable, production-ready full-stack applications with strong focus on performance, clean architecture, and comprehensive testing

Work experience

FPT Software, May 2022 - September 2022

FPT Software is a company specializing in providing software services and solutions to international clients.

I am an intern front-end developer for the company's HR management software development project. My day job is progress reporting, functional analysis, UI code, logic and test writing.

We use React, Redux, Spring Boot, MySQL and AWS for product development.

ITM Management, November 2022 - July 2023

ITM provides comprehensive and flexible IT service solutions, custom-designed to suit the strategic needs of each business.

I work for the company as a front-end engineer building the UI for the HelpDesk Ticket, and SCM are two modules in the company's ERP software suite.

We used ReactJS, Redux, Ant Design, SCSS, Webpack, Jest, React Testing Library for product development.
